

Process Anomaly/Failure Code Analysis: MSTC Related Issues

1. Process Identification

- **Process Name:** MSTC Related Issues
- **Product Overview:** Agent “Chatbot”
- **Process Goal/Objective:** Specific action to address the root cause and mitigate the issue for C14 & C38
- **Code for Analysis (MS1 Stage):** C17, C36, C21, C34, C39, C47, C71 & C41

3. Problem Description & Categorization

- **C17:** No port available
- **C36:** Changed Tel Number to the Right Range
- **C21:** Correct Plate ID not built in System
- **C34:** Correct plate doesn't have available port
- **C39:** Wrong Plate ID
- **C47:** Correct Plate ID NOT PATED
- **C71:** Building Under Construction
- **C41:** Site Not Served

4. Process Scope

- **Start Point:** "Start" - Initiation Chatbot.
- **End Point:** Various end points, including successful appointment confirmation, cancellation, or escalation to the "installation process" or sales.

Proposed Solution: [Specific action to address the root cause and mitigate the issue].

- *Example (for C14):* Implement a real-time inventory update system for field technicians and integrate it with the central system. Conduct mandatory pre-installation site surveys to verify physical infrastructure.
- *Example (for C38):* Implement automated validation rules in the order entry system to flag potential mismatches between site type and service order category. Provide refresher training in sales on customer segmentation.
- **Expected Benefits:** [Quantifiable improvements, e.g., reduced rework, faster installation, improved data accuracy, cost savings].
- **Responsible Party:** [The one who owns the implementation of this solution].
- **Priority:** (High/Medium/Low)

. Process Description

- **Current State Narrative:** Technician at customer side verification of MS1-Stage codes.
C17, C36, C21, C34, C39, C47, C71 & C41
- **Key Steps/Activities (Sequential List):**
 - **Step 1: Start “Chatbot”:** The technician begins the process, with chatbot and selecting MS1-Stage codes to validate.
 - **Step 2: Validate the data provided:** The technician scan the Customer provided document (or) photo taken on site, converts those OCR (or) Photos to validate backend customer data.
 - **Step 3: Validation: Input**
 - Each MS1-Stage code has different input required by Technician to verify chatbot.
 - **C17 - no port available** (1- Granite Photo 2- TB photo 3- Plate Id photo 4- OV photo to prove that their active customer connected in the reserved port.)
 - **C36- Changed Tel Number to the Right Range** (Write in Memo if Tel no. belongs to another city)
 - **C21- Correct Plate ID not built in the System** (1- Granite Photo, 2- NE photo, 3- Plate Id photo)

- **C34 - Correct plate doesn't have available port** (1- Granite Photo showing no port available 2- NE photo 3- Correct Plate Id photo)
- **C39 - Wrong Plate ID** (1- Customer location photo)
- **C47- Correct Plate ID NOT PATED** (1- Granite Photo showing no port available 2- NE photo 3- Plate Id photo if exist)
- **C71- Building Under Construction** (1- Customer location photo)
- **C41- Site Not Served** (No photo shows that All Hay not served)

○ **Step 4: Validation Pass Action: (by each MS1-Stage code)**

- C17 - no port available
 - **If Yes:** Refer to Held with same code.
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
 - Existing Held process
- C36- Changed Tel Number to the Right Range
 - **If Yes:** Refer to ISP stage.
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
 - Existing ISP Process
- C21- Correct Plate ID not built in the System
 - **If Yes:** Deactivate with reason 06
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
- C34 - Correct plate doesn't have available port
 - **If Yes:** Deactivate with reason 06
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
- C39 - Wrong Plate ID
 - **If Yes:** Deactivate with reason 06

- **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
- C47- Correct Plate ID NOT PATED
 - **If Yes:** Deactivate with reason 07
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
- C71- Building Under Construction
 - **If Yes:** Deactivate with reason 07
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.
- C41- Site Not Served
 - **If Yes:** Deactivate with reason 07
 - **If No:** Refer to EBDAA to reschedule the order to proceed for installation or provide more details.

If Data is not Validated / error: The technician re-scan and submit,
re-scan count = 3.
